EMFIRE

The Mobile App for Renewable Energy Sales Reps

The solution helps the field sales reps (inc. sales partners) throughout the full sales cycle from Lead creation up to the deal sign-off.

For: Renewable Energy Companies

Sample Features: Lead Management; Meeting Schedule; Sales Process Management; Task Management; Notes inc. Voice Notes; Feasibility Questionnaires (property details, energy consumption, roof metrics, electric installation details, AC/DC details, energy storage, real estate environment); Roof scanning from the satellite; Client protocols and electronic signature on mobile device; Price estimation and offering from mobile; Roof's sun exposure analysis; client visit map / Route planning; Attachment management and more

Benefits Fully digitalisation of a sales process of field sales reps and sales partners by a mobile app 100% adjusted to the user and business needs; better measurement of sales; up-to-date data and reporting; less paperwork.
